

Introducing a Powerful, Interactive Tool for Overlaying Data and Map Layers

Xplorer is a new add-on to ERIS products, including Database Reports, Topographic Maps, the ON RSC Report and our new Physical Setting Report (if ordered). Xplorer allows you to quickly visualize and analyze environmental risk information related to a particular location, with built-in tools for analysis and customization.

Features of ERIS Xplorer

- **Overlay data and multiple images** over current street layers.
- **Switch between Street, Satellite, or Terrain** base layers to more effectively analyze the project property and related data.
- **Accommodate Custom/Linear Reports** for efficient review and analysis.
- **Filter data sources** and view only the desired data sources on the map.
- **Look up specific addresses or keywords** using the Search functionality.
- **Calculate Distance and Area** using the Measure Tool.
- **Draw and/or add Comments** directly to any layer, then print to PDF for easy sharing between colleagues and clients.
- **Save Views** with your drawings, measurements, notations, and filters.

Call your **REGIONAL ACCOUNT MANAGER** today to arrange a **DEMO**. Visit our website at erisinfo.com/ca_xplorer, or contact ERIS directly at 1-866-517-5204.
