

ERIS — Environmental Risk Information Services has been providing critical environmental risk and historical information since 1999. In 2013, ERIS launched in the United States, and in 2017 began offering information for Mexico, making ERIS the first and only company to provide environmental information across all of North America.

THE MEXICO PACKAGE

PACKAGE INCLUDES:

Database Report

Fire Insurance Maps (FIMs)

Historical Aerial Photographs and a current Topographic Map

DATABASE REPORT

- Offers an **easy-to-use format**, including an Executive Summary, a Detail Report outlining all records found, a map of the project property and surrounding sites within the search radius (for 1 mile), an Aerial, current Topo Map, and Unplottables.
- **Searches 11 essential data sources**, including gas stations; PCBs; collection, storage, use and disposal of hazardous industrial wastes and emissions to air, water and soil.
- **The report features:** hyperlinked page numbers (in the Table of Contents and Executive Summary), Map Keys and Data Sources to quickly access detailed information and/or the Definitions section.

FIRE INSURANCE MAPS (FIMs)

FIM images are included in The Mexico Package, and where not available, a 'no records found' letter will be provided for your due diligence reporting.

AERIALS

ERIS maintains a sizable collection of Aerials covering all of Mexico — from the 1930s to present day in areas along the border and from 1991 in other areas.

The Mexico Package is priced at \$300 USD for a site/property.
