

**A POWERFUL,
INTERACTIVE
TOOL FOR
OVERLAYING DATA
& MAP LAYERS.**

Xplorer is an innovative and interactive tool that optimizes work efficiency. It enables analysis, layering and presentation of data and information. Xplorer integrates Database Reports, Topographic Maps, Aerial Photos, the ON RSC Report, and the Physical Setting Report (if ordered). Built-in features and tools provide address search, data filtering, measurement, customization, and collaboration functionalities. Xplorer accommodates custom large-area and linear reports for efficient review and analysis.

FEATURES OF ERIS XPLORER

Overlay data and multiple images over current street layers.

Switch between Street, Satellite, or Terrain base layers.

Filter data sources and view only the desired data sources on the map.

Look up specific addresses or keywords using the **Search functionality**.

Calculate Distance and Area using the **Measure Tool**.

Draw and/or add Comments directly to any layer, then **print to PDF** for easy sharing between colleagues and clients.

Save Views with your drawings, measurements, notations, and filters.

ERIS Mobile lets you easily conduct research on-site, then seamlessly integrates your findings to ERIS Xplorer for analysis.

Figure Creator, a new tool within Xplorer, generates made-to-order branded figures and photo logs.
